

Fibergate Inc.

| Company Profile

CEO's Message

Since our founding in 2000, we have grown from focusing on network infrastructure and broadband sales to becoming a comprehensive Wi-Fi solutions provider, covering equipment development, manufacturing, and telecommunications services. We were listed on the Tokyo Stock Exchange Mothers in 2018 and moved to the First Section (now the Prime Market) in 2019. Our commitment is to build a business that will endure through future generations, contributing to the future of our country and addressing societal challenges as a responsible company.

Corporate Philosophy

'Thank you' – from our customers, to us.

Our corporate philosophy is to embody this sentiment by contributing to our customers' businesses and creating an environment where "thank you" s are naturally collected in the course of our business activities.

Slogan

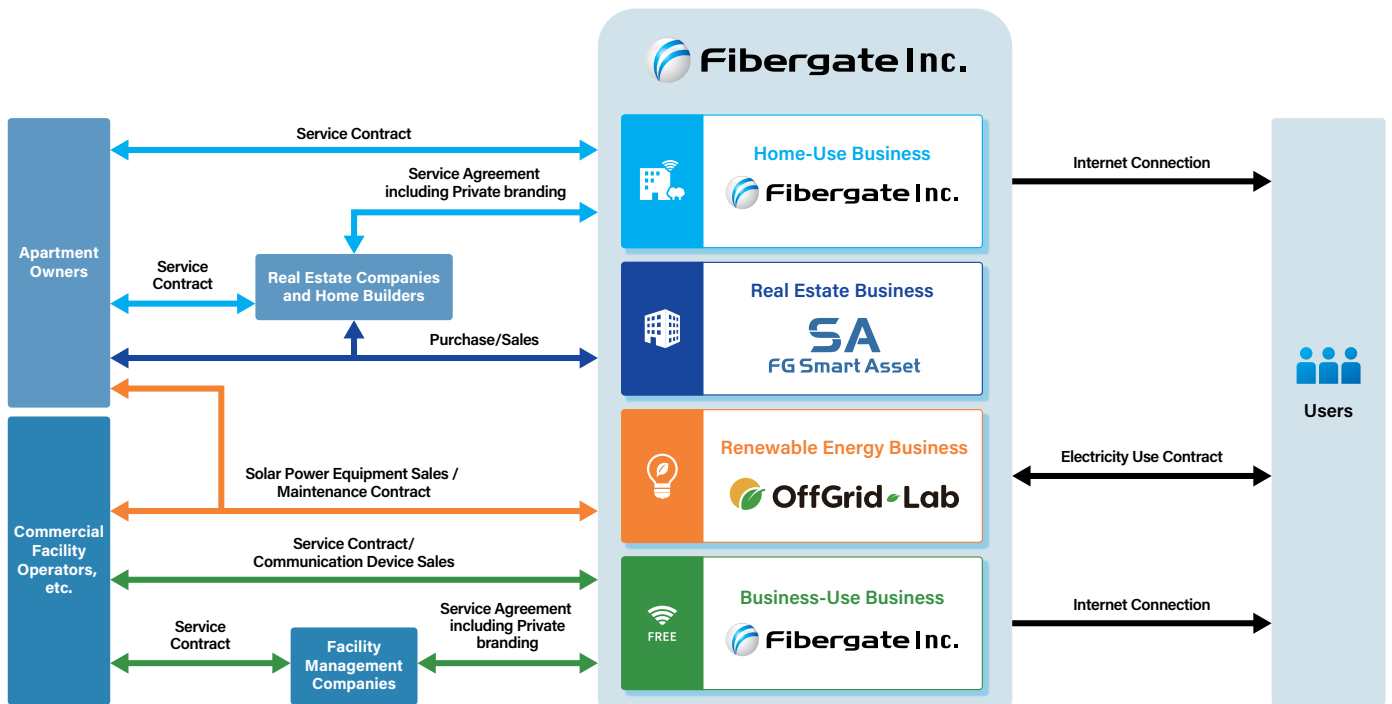

Wi-Fi, Anywhere

-Towards the Realization of an Alternative Carrier-

Company Business Model

We provide Wi-Fi solutions for all types of facilities, offering secure and customized networks that enhance space value and drive digital progress with cost-effective solutions.

We are advancing into a forward-thinking infrastructure company that integrates telecommunications with renewable energy, creating synergistic solutions to enhance customer value and operational efficiency.

In addition to direct sales to residential property owners and facility operators, we are expanding our services through partnerships with real estate management companies and various industry partners.

Private Branding Support

We assist partners in offering Wi-Fi services under their own private brand. Our end-to-end support includes network design, service delivery, installation, and ongoing maintenance, ensuring seamless integration and backing for our partners' business needs.

Home-Use Business

We provide comprehensive internet connection services for residential buildings, including development, manufacturing, installation, and user support. Our services ensure that all tenants enjoy "unlimited free internet access." In addition to direct sales to property owners, we also offer our services under a private brand to real estate-related companies.

Business-Use Business

We provide tailored network solutions for a wide range of sectors, including offices, public facilities, healthcare facilities, hotels, tourist attractions, shopping streets, and commercial establishments. Our services support digital transformation and offer optimized solutions for free Wi-Fi access and comprehensive network management.

Renewable Energy Business

We implement self-sufficient power systems with renewable energy, including solar panels and energy storage. This maximizes self-generated electricity, reduces reliance on external power, and enhances facility value, all while contributing to carbon offsetting and sustainability.

Real Estate Business

We promote IoT solutions based on Fibergate's Wi-Fi technology through the development and brokerage of smart apartments.
